

VersionEye Enterprise Customer Success Story

XING is the leading social network for business contacts in the German speaking countries.

More than 14 million members worldwide use XING to boost their business, relationships and careers. XING is a platform where professionals from all kind of different industries can meet up to find jobs, experts and colleagues to generate new opportunities.

XING employs around **600 people** with approximately **100 in IT and software development**. The Xing engineers are using latest technologies and tools incl. Ruby, Objective-C, CocoaPods & GitHub Enterprise. Teams distributed throughout Hamburg, Munich, Vienna and Barcelona focus on Mobile, Web & API development.

The private **XING** repositories are crawled several times per hour by **VersionEye Enterprise** and the VersionEye dependency badges on the GitHub README pages always show the current status of the dependencies. This helps the **XING** engineers to stay up-to-date with the latest technologies and increases significantly the software quality.

“Automated version notifications of open source and self developed closed source components by VersionEye Enterprise are very helpful especially to our distributed iOS teams. They help reducing coordination and communication efforts. The VersionEye team always did a great job supporting us with individual features!”

Alexander Greim (Director Mobile Engineering @ XING AG)
